

**Date: 20 March 2020**

**To: All our valued Customers and Stakeholders**

**Subject: Global COVID-19 Outbreak**

Unfortunately, the CORONA Virus outbreak continues to escalate throughout South Africa. In this challenging time, it is our main goal to maintain excellent service to each one of our customers whilst protecting the health and safety of our staff and their families.

To this end, M6T Seal Cargo Services has devised a business continuity plan that will ensure we are fully functional and operational. The plan includes hygiene measures, limiting social contact with customers and suppliers, working remotely and suspending local and International travel.

As from Monday 23 March 2020, our team will all be working remotely. Our sales, commercial and operational teams will be available on Email, Landline, Mobiles and WhatsApp.

What does this mean for you our clients, the only change that you will notice is that until the COVID-19 crisis has passed, we request you do not visit our office. All work will proceed as normal and all of our team are still available by the use of the abovementioned communication means.

If you have any difficulty making contact with our staff, please contact the undersigned.

We will do our best to manage this situation and will keep you updated regarding further developments.

Best In health
